Dear Sirs, In reply to your letter

of Aug 28th 2001 regarding the Yucca Mountain as a repository for Nuclear Waste. In reading and studying the scientific and technical information which I have received it would seem that there could be no other place already prepared as a site for this storage so there should be no other answer except YES.

As regards the research of the site those answers should come from the Department that has been studying this problem for 20 years and spending \$6.7 billion, who else should know better?.

As regards the State of Nevada I do not think there is much choice.

Regarding the shipping of this material this also is a very important factor to be considered

however it has come to my attention that your scientists are working on a formula to solidify the waste material so that it can be stored more or less for ever so the shipping across the country should be
